

**Letter Re: Sabotaging the Greens: Home & Away**  
**West Island Gazette December, 20 2007**

To: Alycia Ambroziak

The Harper government's sabotage of a new climate change agreement at the UN conference in Bali is an affront to Canadians. We expect much better, as does the world.

That would be the same Harper government that is planning the destruction of a truly remarkable West Island green space, with thousands of trees, wonderful ponds and streams and a migratory bird habitat that has been enjoyed by tens of thousands of Montrealers, on land that is adjacent to Trudeau Airport. The Harper government intends to destroy Golf Dorval by building speculative industrial sites that have nothing to do with airport operations. At home or on the world stage, this prime minister's policies are destroying our environment.
